Tri Wahyu Guntara

Applied Research Engineer (RL), KRAFTON

wahyu.guntara@gmail.com · gunnxx.github.io · github.com/gunnxx · linkedin.com/in/wahyuguntara

Research interests: making reinforcement learning work outside benchmark conditions — from agents shipped in games to sim2real transfer on physical robots.

Experience: state, action, and reward design for game environments; sim2real and vision-language-action (VLA) models for robot control; information-theoretic representation learning; multi-agent policy optimization.

EDUCATION

2021.09 - 2024.08 **M.S. in Artificial Intelligence**, Korea Advanced Institute of Science and Technology (KAIST)
(Advisor: Kee-Eung Kim)
Thesis: Information-Theoretic Distraction-Free Representation Learning for Visual Offline RL

2016.09 - 2020.08 **B.Eng. in Electrical Engineering**, Universitas Indonesia

EXPERIENCE

2026.07 - Present **Research Engineer**, Ludo Robotics Seoul, South Korea
- Concurrent position, dispatched from KRAFTON to Ludo Robotics, a robotics spin-off of the company

2024.11 - Present **Applied Research Engineer (RL)**, KRAFTON Inc. Seoul, South Korea

2025.12 - Present **Physical AI Team**
- RL for sim2real and vision-language-action (VLA) models

2024.11 - 2025.11 **Reinforcement Learning Team**
- RL agents for PUBG and PUBG: Blindspot

2023.01 - 2024.08 **Graduate Student Research Assistant**, Artificial Intelligence & Probabilistic Reasoning Lab, KAIST South Korea
- Reinforcement learning and thesis project under the advisory of Prof. Kee-Eung Kim

2022.01 - 2022.12 **Graduate Student Research Assistant**, Autonomous Vehicles and Embedded Systems Lab, KAIST South Korea
- Self-driving car and reinforcement learning under the advisory of Prof. Seung-Hyun Kong

2019.06 - 2019.12 **Research Scientist Intern**, Kata.ai Indonesia
- Benchmarked models on Indonesian sequence labeling tasks (POS tagging, NER, SRL)
- Collected scattered Indonesian-English data and benchmarked models on neural machine translation

LREC Workshop on Building and Using Comparable Corpora (BUCC) 2020
paper

PROJECTS

2024 **CLEAR: Controllable Latent State Extractor for Visual Offline RL**
Master's thesis project on learning agent-centric latent representations that remain robust when the visual observation is full of distractions.
project page paper code

2018 **PALAPA-707: An Autonomous VTOL Drone for the Indonesia Flying Robot Contest 2018**
Undergraduate team project at Universitas Indonesia: an autonomous drone for payload pick-up and delivery, built around a PID controller with vision-based target detection.

SCHOLARSHIPS & AWARDS

2021.09 - 2023.08 **Hyundai Motor Chung Mong-Koo Global Scholarship**
Full scholarship for the duration of the 2-year master's study at KAIST

2018.11 **Indonesia Flying Robot Contest 2018 — Honorable Mention**
Vertical take-off and landing (VTOL) category
